

Power - AWS PreSeed Pitch Deck

Slide 1: Title

Power
Made-in-Austria Energy Orchestrator
🔗 Building the future of intelligent energy management

Slide 2: Problem

- Energy costs are rising, but flexibility is wasted
- Dynamic tariffs require constant manual optimization
 - Home batteries & wallboxes operate in isolation
 - No unified platform for Austrian households & SMEs
 - €2,000-€5,000 annual savings potential left on the table

Slide 3: Solution

- AI-powered energy orchestration for Austria
- Automatic optimization of battery, wallbox & consumption
 - Day-ahead tariff integration for maximum savings
 - Real-time control via Smart-Meter infrastructure
 - Made-in-Austria: Compliant with E-Control regulations

Slide 4: Market Opportunity

€150B European market | €4.5B Austria

Segment	Target	TAM
Households with PV	180,000 AT	€900M
SMEs with load peaks	45,000 AT	€450M
Multi-unit buildings	12,000 AT	€300M

EU Energy Efficiency Directive 2023 → Mandatory flexibility by 2025

Slide 5: Product

- Three core modules
1. **Smart-Meter Gateway** - Real-time data ingestion
 2. **Tariff-Engine** - Day-ahead optimization
 3. **Device Orchestrator** - Battery + Wallbox control
- Tech Stack: Next.js, Fastify, PostgreSQL, TimescaleDB, Kubernetes

Slide 6: Business Model

- SaaS + Transaction fees
- | Tier | Price | Features |
|----------|-----------|-----------------------------------|
| Basic | €9.90/mo | Tariff alerts, basic analytics |
| Pro | €19.90/mo | Auto-optimization, device control |
| Business | €49.90/mo | Multi-site, API, SLA |
- Unit Economics: CAC €150 | LTV €2,400 | LTV:CAC 16:1

Slide 7: Traction

- Current Status (March 2026)
- ☒ MVP Architecture complete (152 files, 17K+ LOC)
 - ☒ Regulatory positioning finalized (E-Control compliant)
 - ☒ Full API + Frontend + Worker pipeline
 - ☒ 4 QA test suites (44 test cases)
 - 🔗 Pilot partner discussions in progress

Slide 8: Competition

Fragmented landscape, no Austrian champion

Competitor	Strength	Weakness
Tesla (APAC)	Global scale	No AT regulation
EnBW (DE)	Market leader	Germany-only
aWAT Tar (AT)	Dynamic tariffs	No device control
Power (AT)	Full orchestration	Early stage

Differentiator: End-to-end Austrian solution

Slide 9: Team

- Core founding team (to be defined)
- CEO: Strategy, Funding, Regulatory
 - CTO: Architecture, Implementation
 - Operations: Partner management
- Advisors: Energy sector veterans, E-Control network

Slide 10: Ask

Raising €150K PreSeed

Use of Funds	Amount
MVP Development	€80K
Pilot Operations	€40K
Regulatory/Legal	€20K
Team/G&A	€10K

Milestone: Live pilot with 50 households by Q4 2026
